

New From Widney

The LE range of Gas and Electric fires

In recognition of the ever increasing requirement for energy conservation, Widney have developed new ranges of Gas and Electric Fires designed to dramatically reduce energy consumption.

The LE Gas fire range

Specifically developed for Holiday Homes built to a more energy efficient specification, the new LE range provides the comfort of instant heat but with a dramatic reduction in gas consumption.

- Instant heat
- Energy efficient
- Timer function
- Output rating similar to a domestic Electric Fire

**CURVASCAPE LOW ENERGY TIMER
GAS FIRE**

The LE Electric fire range

Specifically developed for Holiday Homes built to a more energy efficient specification, the new LE range provides the comfort of instant heat but with a dramatic reduction in electricity consumption.

- Instant heat
- Energy efficient
- Living flame effect
- Timer function
- Output rating similar to a domestic Electric Fire

**LAVAFLAME LOW ENERGY TIMER
ELECTRIC FIRE**

Energy Management and Control

Widney

emac

**emac is an intelligent energy management control
system that eliminates unnecessary energy usage**

Fully automated control of your home energy usage

Widney emac is an intelligent energy management control system that regulates energy usage in a home.

It offers fully automated control whether your home is occupied or unoccupied. Digital control technology, PIR, door and window sensors and integral thermostat feed data to the unit which automatically adjusts the heating system accordingly to eliminate wastage. Widney Leisure is a leading innovator and producer of gas and electric heating appliances, water heaters, energy recovery systems and integrated home management controls for the domestic and leisure markets.

Benefits

- Fully automated control
- Pre-set for convenience
- Movement detection
- Door & window sensors
- Day & night modes
- Eliminates unnecessary energy usage
- Safety & security features available
- Holiday park integration – up to 1,000 homes

Utilises wireless technology

Control times & temperature remotely

Smart phone friendly

Web based interface

Door, window and passive infrared (PIR) sensors check to see if these are open, or if your home is occupied or unoccupied by automatically sensing no movement for 24hrs this prevents unnecessary energy usage.

Motion Sensors

Door Sensors

Occupied

Unoccupied

Pre-set settings are:

Normal Mode

ECO Mode

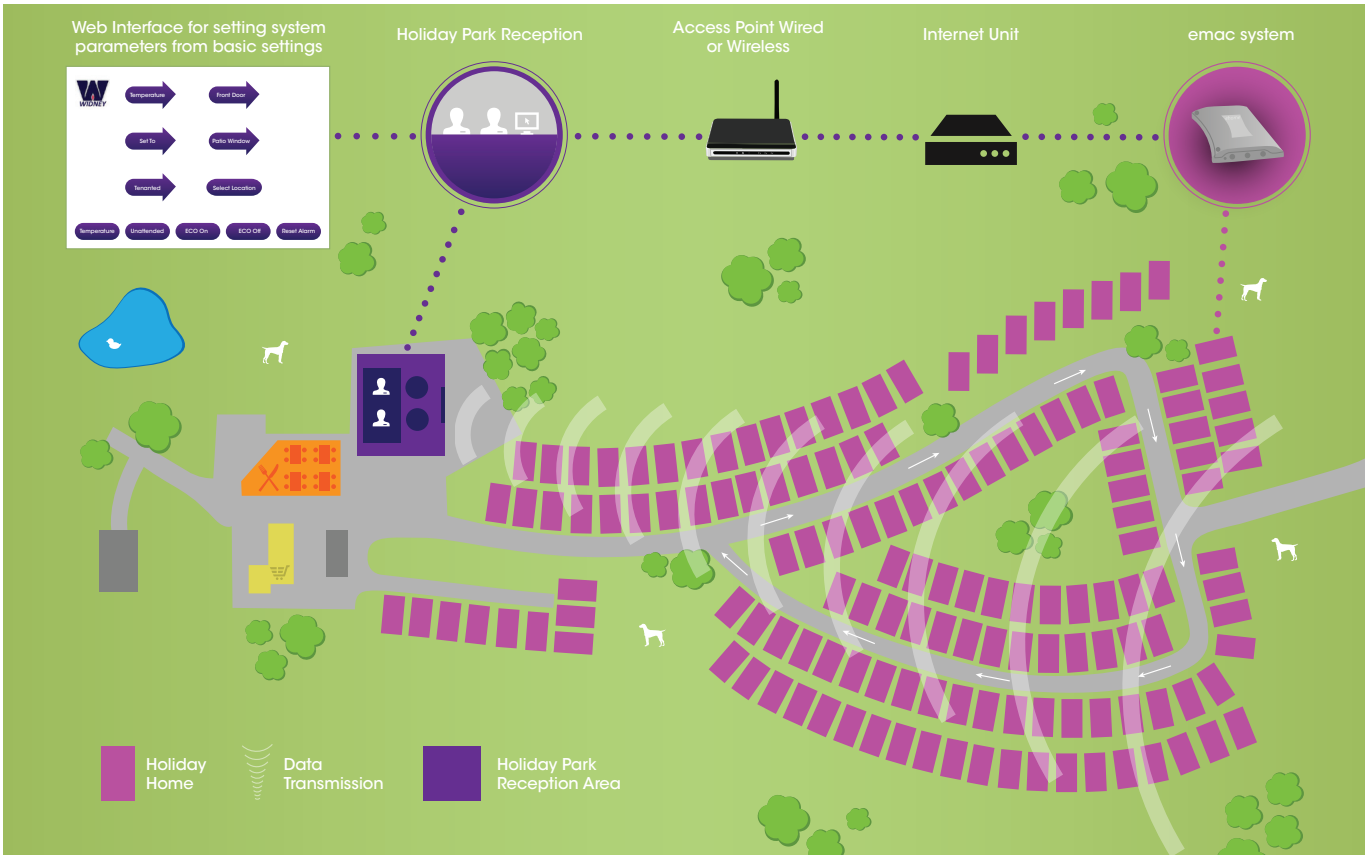

Night Mode

Morning Mode

Holiday Park Integration
